

Company:	Operating manual	Date:
Working area: Field edge Depot	Workplace: clamp covering equipment- mobile machinery Activity: Repairing the beet protection fleece or transporting it to the depot	Signature:

DESCRIPTION

Procedure to **recover the fleece** from the field edge (if it could not be transported away while uncovering)

- The sugar beet covering machine (work device with attachments, trailer) drives to the edge of the field, uncouples the trailer and moves to a working position
- If necessary, position the fleece so that it can be wound up
- Wind up of the fleece and place it in the trailer (this process can be repeated several times)

Assistants move next to the trailer and clamp and must wear safety vest and safety shoes!

- Secure the work equipment in the tractor, attach the trailer and drive towards the next clamp.

Procedure to **repair fleece** at depot

- The sugar beet covering machine (work device with attachments) is brought to a working position)
- Fleece is unwound and wound up again after repair
- Fleece is stored again (this process can be repeated several times)

Assistants move to next to the operating machine and must wear safety vest and safety shoes!

HAZARDS TO HUMANS AND THE ENVIRONMENT

- ◆ Risk of tripping and turning the ankle
- ◆ Driving operating machine, risk of crushing,
- ◆ Falling fleece
- ◆ Risk of falling
- ◆ Risk of slipping

PROTECTION MEASURES AND RULES OF CONDUCT

- ◆ Assistants and machine drivers must wear safety clothing (safety vest, safety shoes, safety gloves).
- ◆ Assistants **must not** be present within the working radius of working machines.
- ◆ Assistants and machine drivers should always maintain eye contact if possible.
- ◆ The attachments, especially the crane, must not be overloaded. This is to be observed in particular when fleeces are wet or have gained a lot of weight due to ice and snow cover.
- ◆ Assistants working during fleece wound-up, must wear tight-fitting clothing and remain in view of the machine driver at all times.
- ◆ **Driver's instructions must be followed at all times.**

BEHAVIOUR IN CASE OF FAULTS

- ◆ Park the mobile machinery,
- ◆ Eliminate the fault

BEHAVIOUR IN CASE OF ACCIDENTS FIRST AID - EMERGENCY CALL 112

- ◆ Implementation of emergency measures at the site of accident
- ◆ Call ambulance / doctor
- ◆ Inform company / management and responsible insurance association

CONSEQUENCES OF NON-COMPLIANCE

Health consequences: Injury, fatal injury

SPECIFIC INSTRUCTIONS REGARDING OPERATION
